GENERATION FUTURE

# HOOVER

## MORE THAN 100 YEARS OF EXPERIENCE

It is rare that a brand becomes synonymous with a product. It is even rarer that a brand remains in the forefront of design and technology within that product area for more than 100 years. It was in fact in 1908 that Hoover assembled the first vacuum cleaner in Canton, Ohio, to solve the problem of asthma generated by dust. The idea was ingenious and immediately became successful throughout the US and quickly also in Europe, thanks to a smart and very professional sales team. Since 1908, until now, we have continued to listen to the needs of our users and we have invested in new technologies, in design and in ergonomics to make lives easier and smarter.

## INNOVATION, TECHNOLOGY AND DESIGN

We want you to trust us and be satisfied with our products for many years and when you come to renew, return to Hoover for the latest model. All our vacuum cleaners provide maximum cleaning performance, converting motor power into suction power in the most efficient way possible. So whichever model you choose, you know you clean better, faster with Hoover. Hoover is today a worldwide brand-leader in floorcare, washing, cooking and refrigeration, that constantly looks to offer to its customers, creative and innovative products, that meet today the standard of tomorrow. This is why our mission is "Generation Future".

PRODUCT TABLES	72
----------------	----

BEFORE YOU SELECT A NEW VACUUM CLEANER FOR YOUR HOME, SPARE A FEW MINUTES TO MAKE THE RIGHT CHOICES. THE MAIN ASPECTS TO CONSIDER ARE: TYPE OF FLOORING, SIZE OF YOUR HOME, PRESENCE OF ANIMALS, CASES OF ALLERGY. HOOVER OFFERS THE WIDEST SELECTION OF PRODUCTS TO GIVE YOU THE PERFECT SOLUTION TO YOUR NEEDS.

### CANISTERS

Ideal for thorough cleaning of most floors and other surfaces, such as sofas and upholstery, and for all size of homes. They are light to carry around, they reach everywhere thanks to the flexible hose and its attachments. They come with a wide range of accessories for special needs (pet hair, carpets, rugs, etc). You need to allocate some space for storage.

### STICKS

Ideal for frequent cleaning of hard flooring. They are ready to use and only need a small space for storage. If you find traditional corded sticks a bit heavy, choose a cordless version: they are designed for a quick and effective cleaning of smaller homes; they are lighter and very flexible to use.

### UPRIGHTS

Ideal for carpet flooring. Thanks to the motorized brush-bar they clean thoroughly carpet floors. They come equipped with a range of accessories, all stored on board for immediate use, to clean, all soft furnishing and for the efficient removal of pet hair. Uprights are especially efficient at, cleaning large carpet areas, because of their height they cannot easily be stored under a shelf, or in a box. Hoover also offers a special version for hard floors, called Floormate.

**POLISHERS**

Ideal for delicate hard floors such as marble, tile and parquet. They combine vacuuming with a polishing action using 3 rotating brushes located at the bottom of the foot. Polishers come with a set of different brushes to be used depending on the type of floors. Hoover offers the only polisher especially designed for parquet.

**HANDHELDS**

Ideal for quick spills all around the house. They are equipped with rechargeable batteries, and are normally hung on a wall with their charging base, so they are always ready to use. Hoover handhelds come in bright colours and elegant silver finish, to give a hint of design to your working areas.

**ROBOTS**

Ideal for a daily cleaning, to reduce the effort when you do the weekly cleaning with your traditional vacuum cleaner. It keeps your floors clean from the little everyday dust, and gives a touch of design and technology to your home.

**STEAM PRODUCTS**

Ideal to clean your house, there is no need for chemicals or detergents: simple tap water will provide excellent results. Every kind of dirt will be loosen through the impressive and strong power of high temperature steam. Moreover, the steam action offers the advantage of odors removal with no trace. trace.

# DUST MANAGEMENT TECHNOLOGIES

AFTER HAVING SELECTED THE TYPE OF PRODUCT, YOU WILL NEED TO DECIDE WHICH IS YOUR PREFERRED WAY OF MANAGING DUST: DO YOU NEED A PRODUCT WITH A BAG OR WITHOUT? HERE YOU CAN FIND THE MAIN ADVANTAGE OF THE TWO TYPE OF TECHNOLOGIES.

### BAG DUST COLLECTOR

Depending on the type of bag, you may have a different level of dust retention. We can define 3 types of bags:

#### PROS:

##### HYGIENE:

once dust enters into the bag, you have no further contact with it. A special sealing will automatically close the bag when you remove it from the cleaner, so no dust can exit.

##### HIGHER AIRFLOW:

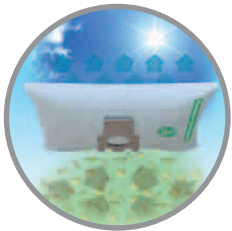

which is mainly needed to effectively clean carpets, rugs and removing pet hair.

**IDEAL FOR ALLERGY SUFFERERS AND FOR PET OWNERS.**

#### CONS:

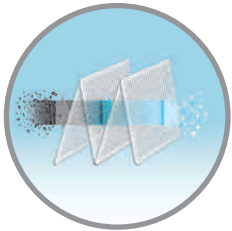

##### BAGS NEED TO BE REPLACED:

on average you will need to change the bag every 6/8 weeks.

### HEPA BAG

They have up to 30 times more retention capability than standard bags, which results in no emission of dust. Some Hepa bags incorporate Active Carbon Filters for odour removal. They are ideal if you suffer from allergies.

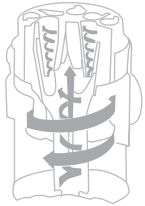

### PUREFILT BAG

They have 3 layers of filtration which helps reduce the proliferation of germs and bacteria.

### PAPER BAG

Standard dust collectors. The more the layers, the better the dust retention.

### **BAGLESS DUST COLLECTOR**

There are 3 technologies that differ for the frequency of maintenance, the drop in suction power and the amount of dust that you will get in contact with:

#### **PROS:**

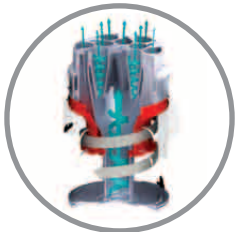

##### **NO NEED TO BUY BAGS:**

so you save money and you don't have to worry about having spare bags.

#### **CONS:**

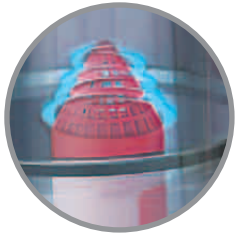

##### **NEED TO BE CLEANED REGULARLY:**

the dust container needs to be emptied on a regular basis. In systems based on filter separation, the filter has to be cleaned regularly to maintain suction power.

### **MULTICYCLONIC/AIRVOLUTION™**

It is the most advanced technology and it is based on the action of many small cyclones that quickly separate air from dust, pushing the latter to the bottom of the dust container. Only minimum dust goes to the filter, which therefore needs minimum maintenance. Suction power remains high and constant, with no losses.

### **SINGLE CYCLONE**

These systems are equipped with just one cyclone to generate the centrifugal effect. In this case the separation of dust from air is less effective and more dust will deposit onto the filter, requiring more frequent maintenance to keep a high suction power.

### **FILTER BASED**

The separation is done by a large filter that sits in the centre of the dust container. Most of the dust will deposit on the filter and you will need to clean it regularly to maintain the suction of your cleaner.

# USER TIPS

## FILTRATION

FILTRATION IS A KEY POINT OF VACUUM CLEANERS. BEFORE YOU BUY A VACUUM CLEANER MAKE SURE THAT ALL FILTERS ARE WASHABLE, FOR A LONGER LASTING CLEANER.

**IN A BAGGED SYSTEM YOU HAVE 3 LEVELS OF FILTRATION:**

The bag where dust is collected; the pre-motor filter; the exhaust air filter.

**IN A BAGLESS CLEANER THERE ARE 2 LEVELS OF FILTRATION:**

One pre-motor and one for exhaust air.

### FILTERS CAN BE OF TWO MAIN TYPES:

**HEPA (HIGH EFFICIENCY PARTICULATE AIR):**

Have the capability of capturing most harmful bacteria even of very small size.

**MICRO FILTERS:**

Can capture the most common dust typically present in the house.

Filters can come with a special treatment called Bactizero™ that reduces the proliferation of most common bacteria such as “staphylococcus aureus” and “escherichia coli”.

### DO YOU SUFFER FROM ALLERGIES? OR HAVE YOU GOT YOUNG CHILDREN?

We have managed to exploit the anti bacteria power of silver, known since ancient times, to develop a special treatment for plastics, called silver ion. This is used for bagless product dust containers and for mini turbo nozzles; it reduces 99,9% of bacteria colonization in 24h, for an healthier environment.

If you suffer from allergies or have young children, look for a product with Hepa Filter and Bactizero™ treatment and either Hepa Bag or dust container treated with silver ions. This combination will help you to significantly reduce the risk of asthma and allergic reaction to dust.

### **SPACE IS AN ISSUE FOR YOU?**

Look for the products designed to save space both in use and in storage. There are compact canisters with Nanopack™ Evo system, stick with foldable handle and uprights with removable handle. No matter the product, Hoover has designed the right solution to help you save space.

### **HAVE YOU GOT A LARGE AND SPACIOUS HOUSE?**

A spacious house may require a lot of time to be cleaned. But not with Hoover products, designed to deliver maximum performance and help you save time in cleaning.

### **HAVE YOU GOT A LOT OF STAIRS IN YOUR HOUSE?**

You dream of a light and easy to carry product when you go up and down the stairs cleaning them? As the surfaces' specialist, Hoover has the right products for you: they are light, compact, easy to use and carry.

### **DO YOUR NEIGHBOURS COMPLAIN ABOUT THE NOISE OF YOUR VACUUM CLEANER?**

If you want to care for your house's surfaces without disturbing people around you, Hoover has got several products with special noise reduction technologies, and of course with no loss of performances.

### **DO YOU WANT TO MOVE FREELY AND EASILY WHEN CLEANING YOUR HOUSE?**

Hoover rechargeable products allow you to clean without the obstacle of the cable and guarantee the best performances without any compromises.

### **DO YOU HAVE A GLOSSY FLOOR SURFACE?**

To treat delicate surfaces as marble and parquet and bring them to their original brightness, Hoover has created specific products, designed to clean every treated surface without damaging it.

### DO YOU SUFFER FROM ALLERGIES OR HAVE GOT YOUNG CHILDREN?

Allergy Care is the Hoover Kit created to drastically reduce the proliferation of allergens. Allergy Care lets you clean your house safely, removing dust allergens and making the air you breathe cleaner.

### CONTACT WITH DUST IS AN ISSUE FOR YOU?

In principle you should choose a product with bag dust container, but Hoover has also developed bagless systems with easy empty mechanisms, to prevent unwanted contact with dust.

### DO YOU WANT TO HAVE YOUR ACCESSORIES CLOSE AT HAND AND READY TO USE?

Many Hoover products are designed with accessories stored on board; so you can have them readily available whenever you need them. Finally a clever solution to the usual problem of lost accessories.

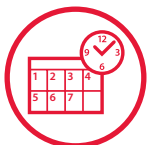

### DO YOU NEED TO DRAW FLUIDS FROM THE SURFACES?

How often do you spill water at home? In order to draw fluids, Hoover has created specific products which guarantee excellent results also on delicate surfaces.

### ARE YOU CONCERNED ABOUT LOSSES IN SUCTION POWER?

Hoover offers products with the best performances in the market. For maximum performance of a bagless product, look for models that guarantee no losses in suction power. This is normally achieved by combining multi-cyclones with high performing filters.

### DO YOU WANT MORE FREE TIME TO DO WHAT YOU LIKE?

The new Robo.com<sup>®</sup> is the answer to your need because it cleans your house automatically taking care of your furniture and floors. Your life has never been so easy and comfortable.

### THE ENERGY LABEL REVOLUTION IN 3 SIMPLE POINTS

1

From 1 September 2014, energy labels have become part of the vacuum world, appearing on canisters, corded stick vacuums and uprights introduced into the European Community from that date. The legislation does not apply to the following products: liquid vacuums, dust and liquid vacuums, battery operated products, robot vacuums, centralized vacuum cleaning systems, industrial application products, polishers and outdoor vacuums.

2

Thanks to the energy label, the consumer can compare vacuums against the objective and shared criteria of energy efficiency, suction performance on various surfaces - hard floors and carpet - filter efficiency and sound levels.

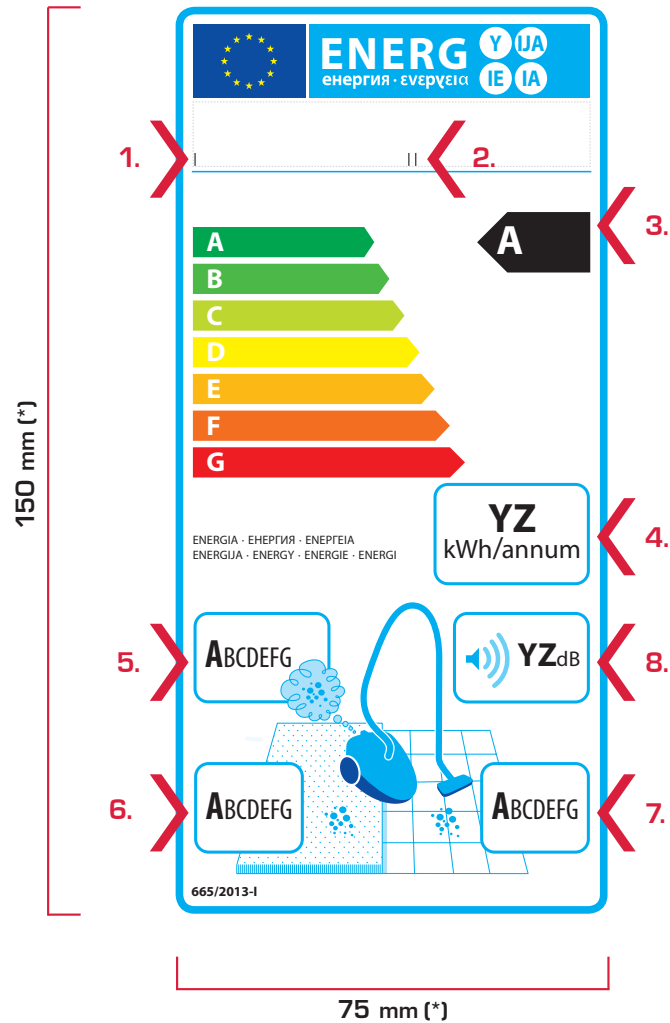

3

By virtue of the limits set by the new regulations, new vacuums will use less energy\* and guarantee better suction performance. It is therefore very important to carefully read all the details regarding the surface cleaning capability of the vacuum on the energy label, and not just stop at the energy efficiency rating.

Hoover has taken on this historic change in the vacuum world with the same specialist approach that has always set the brand apart: new products with high performance and low energy consumption that will meet all needs, in all the categories in which it operates. All this without forgetting design, technology and innovation: the distinctive elements of the Hoover brand.

\*The power must be less than or equal to 1600W, with annual consumption measuring less than 62KWh.

# THE ENERGY LABEL HOW TO READ IT

## LABEL FOR GENERAL USE PRODUCTS

- 1 - 2 Name or manufacturer brand and model identification code
- 3 Energy efficiency index: 7 classes from A to G
- 4 Average annual energy consumption\*
- 5 Filtration efficacy - Dust Re-Emission Class
- 6 Carpet Cleaning Performance Class
- 7 Hard Floor Cleaning Performance Class
- 8 Sound level - Sound power expressed in Decibels

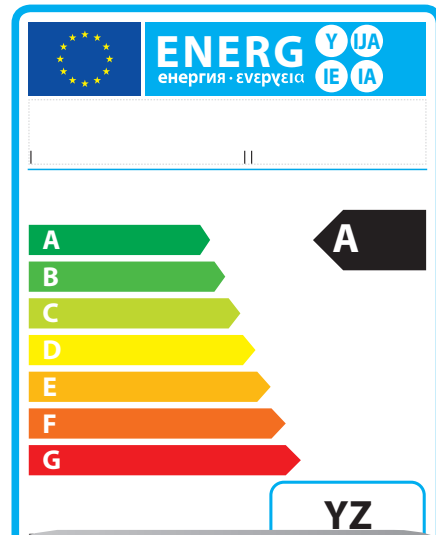

\* The calculation is estimated in a home with an average surface area of 87m<sup>2</sup>, where the vacuum is used 50 times per year (just less than once a week).

# THE ENERGY LABEL HOW TO READ IT

## LABEL FOR PRODUCTS USED ON HARD FLOORS OR CARPETS

This could assist a consumer, who only has hard floors or carpets at home, to choose the right product.

For hard floors

ENERGIA · ЕНЕРГИЯ · ΕΝΕΡΓΕΙΑ  
ENERGIJA · ENERGY · ENERGIE · ENERGI

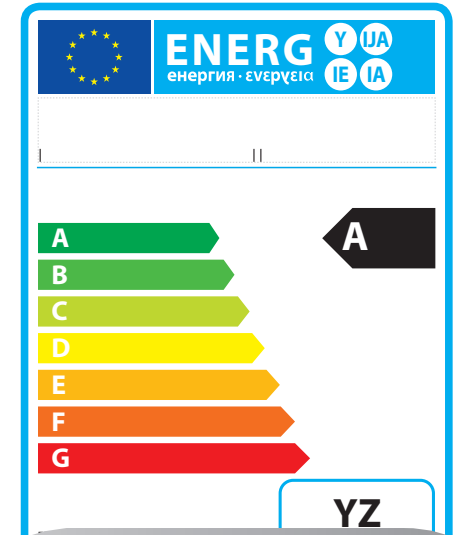

YZ  
YZ  
kWh/annum

YZdB

YZ  
kWh/annum

YZdB

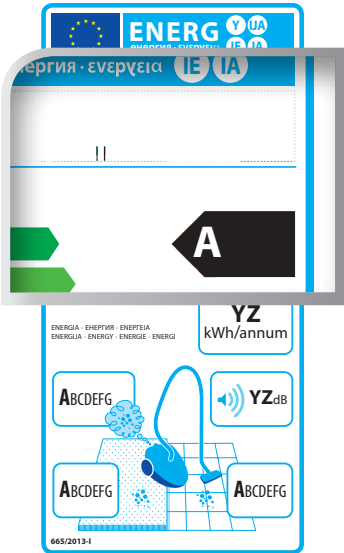

ABCDEFG

The 'not for use on hard floors' icon indicates that the product has not been designed for such surfaces.

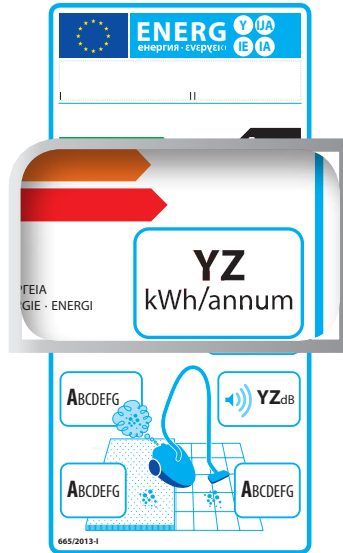

# THE ENERGY LABEL

## WHAT DO THE PARAMETERS ON THE LABEL INDICATE

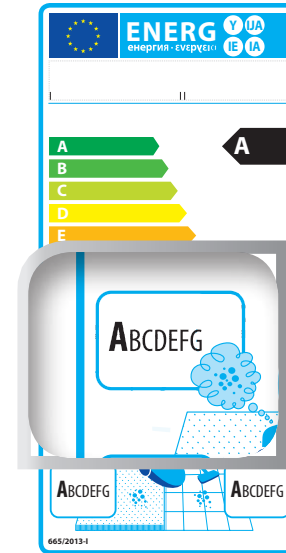

### ENERGY EFFICIENCY INDEX

Indicates the efficiency of the product in terms of energy consumption and vacuuming performance. It is measured against 7 classes, from A to G. Class A indicates maximum energy efficiency.

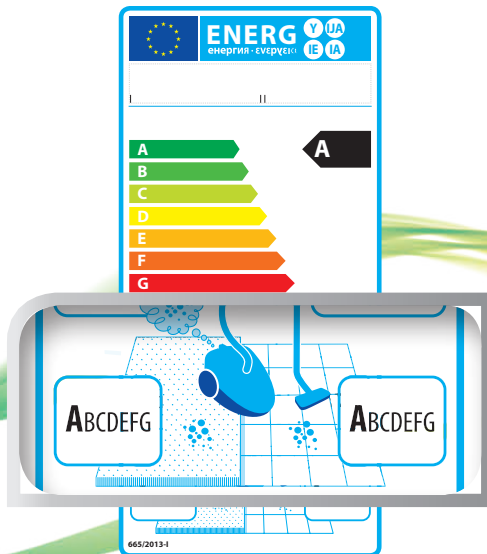

### AVERAGE ANNUAL CONSUMPTION (KWH/YEAR)

Indicates the energy consumption of the product in KWh per year, based on standard use of one hour per week on a surface area of 87 square meters.

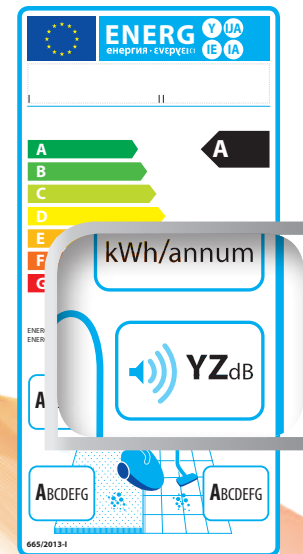

### CLASS INDICATING FILTRATION EFFICIENCY

Indicates the quality of the air put back into the environment taking into consideration the quality of the filters, the bags - in the case of bagged vacuums - and the degree of air tightness of the product.

### CLASS INDICATING SUCTION PERFORMANCE ON HARD FLOORS AND CARPETS

Is measured against 7 classes from A to G: class A indicates maximum vacuuming performance on a specific surface.

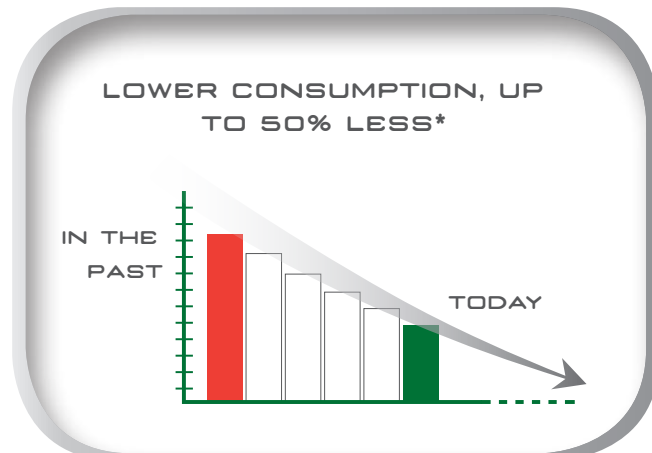

### SOUND LEVEL

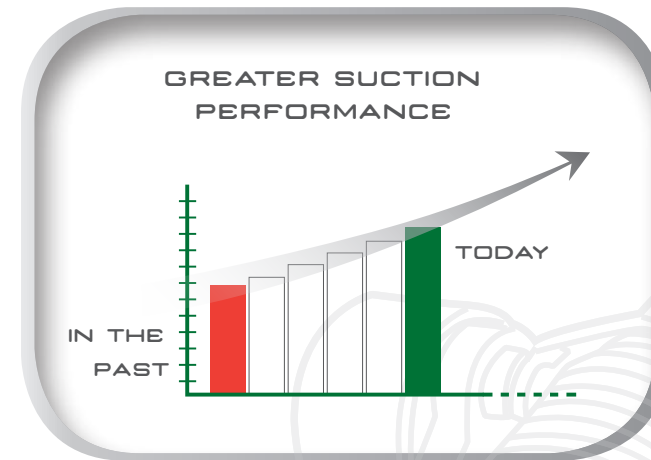

Indicates the sound level of the product, as expressed in Decibels.

# RESEARCH AND INNOVATION IN SERVICE OF ENERGY EFFICIENCY

With the introduction of the energy label, Hoover presents a new generation of vacuum cleaners designed to use less energy, but that guarantees better cleaning performance than older high wattage products. The results achieved, not only for class A energy efficiency, are the outcome of a great deal of research and development that have led to identifying unique and patented solutions.

+

\* IN ACCORDING TO THE FUNCTIONALITY OF THE MODELS

## MORE EFFICIENT VACUUM CLEANER

Thanks to the exclusive H Lab nozzles, Hoover vacuums reach high levels of cleaning performance on all surfaces, whether hard floors or carpets, taking care of even the most delicate surfaces, such as parquet flooring.

A wide range of class A products designed to meet all your cleaning needs, with a lower level of energy consumption. Discover the new Hoover range and you will find all of our triple A stars!

# H LAB NOZZLES

## LOWER ENERGY CONSUMPTION, BETTER PERFORMANCE

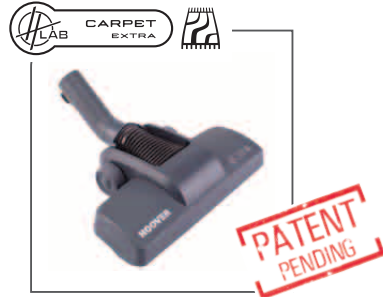

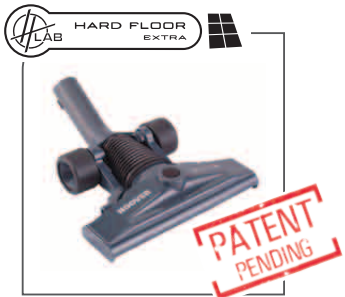

From the experience of the Hoover's HLab research laboratories, was born a new complete range of nozzles: thought to achieve the best performance of the new energy label parameters and to meet all your cleaning needs.

### NOZZLES FOR EVERY SURFACE

ALL FLOORS: ideal for clean every day hard floors and carpets, with a pedal to select the desired function.

### SPECIFIC NOZZLES FOR HARD FLOOR & CARPET

Extended' dust pickup  
Double pivot

Extended' dust pickup  
Double pivot  
Smooth and uniform soleplate

CARPET EXTRA: Hoover's patent pending for carpets, with double pivot, it is delicate and effective.

HARD FLOOR: ideal for clean hard floors, guarantee high dust pickup performance.

### A WIDE RANGE OF ACCESSORY NOZZLES

GRAND TURBO: powerful and compact, specific to penetrates deep in the carpet fibers.

PARQUET and PARQUET EXTRA: is suitable for parquet and for delicate surfaces, thanks to natural bristles and felt wheels.

MINI TURBO: studied to deeply clean the furniture thanks to bristles, which penetrate deep in the carpet fibers, ideally for pet owners.

MINI TURBO ALLERGY CARE: with Silver Ion treatment, it reduces the bacteria colonization, ideally if you suffer from allergies.

ROBOT

### DOMESTIC WIFI CONNECTION\*

It will be possible to easily and quickly interact with your robot through your smartphone, manage the cleaning operations and follow the instructions to optimize the use.

### ULTRA SLIM

Robo.com<sup>3</sup> is extremely slim. It gives you the possibility to clean under furniture and sofa with maximum manoeuvrability.

### LITHIUM BATTERY

The lithium battery guarantees outstanding performances and long lasting autonomy up to 120 min. The charging time is reduced with no memory effect.

# CANISTER BAGLESS

# XARION PRO

MAXIMUM PERFORMANCE FOREVER

## HIGH AND CONSTANT SUCTION POWER

The powerful Airvolution™ multicyclonic technology reduces your cleaning time by up to 50%\* thanks to high and constant suction power.

## DOUBLE HEPA

Always maximum performance thanks to a new filter configuration that optimizes the airflow circulation:

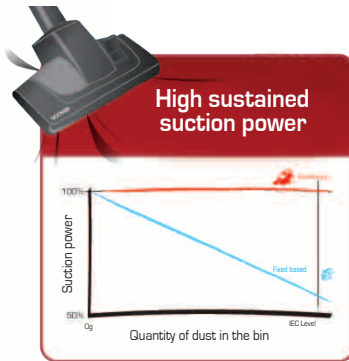

- Pre-motor Hepa
- Exhaust Hepa pleated filter

Maximum airflow and perfect filtration, for a healthier indoor environment.

## EASY BIN EMPTY

Get the job done quicker: Xarion Pro is designed to enable you to release and empty the bin by one hand and in two seconds. Everything is very easy and quick, so you do not waste time.

GENERATION FUTURE

# CANISTER BAGGED

### 5L EXTRA-LARGE BAG CAPACITY

Athos is provided with a massive 5 litres bag capacity, that is the 40% more compared to the Hoover range. This incredible bag size allows you to reduce maintenance saving time and money.

### MAXIMUM MANEUVERABILITY

Thanks to the 360° rotating hose and the 4 castor wheels, Athos grants maximum maneuverability.

### THE NANOPACK™ TECHNOLOGY\*

The Nanopack™ technology is a unique feature conceived to solve the daily issue of saving space. It allows a very compact storage of your Athos: just lock the tube around the product body and fit both the rigid tube and the nozzle on its back, in the apposite grooves.

Thanks to the integrated accessories door you can easily access the dusting brush, the furniture nozzle and the crevice tool. Save space, time and avoid accessories' loss.

## 360° ROTATING HOSE

The 360° rotating hose makes Telios Plus really manouvrable. It will perfectly follow you during your cleaning operations.

## EPA FILTER

Even the smallest pollutants and pollen particles are retained thanks to the efficient pre-motor Epa filter. Just wash the filter under warm water to regenerate the Epa filtration properties every time.

# FREESPACE EVO

SUPER COMPACT PERFORMANCE

## SUPER COMPACT WITH NANOPACK EVO™

Details make the difference in Freespace Evo: the exclusive system Nanopack Evo™ ensures super-compact dimensions. Product with hose, telescopic tube and nozzle can be easily stored in very small areas. With just 3 movements, all the components find a place on the product. Freespace Evo is a real spacesaver.

## ACCESSORIES ON BOARD

The freedom at hand. The two helpful accessories are stored on board to save time: always available, easily accessible.

## ERGO ROLLER VARIABLE POWER

The innovative ergonomic power control allows higher comfort in the power setting: without bending and with minimal effort, simply run your foot over the ergo roller, to control suction power.

# STEAMJET HANDY

THE NATURAL WAY OF CLEANING

## NO WAITING TIMES

Thanks to the unlimited autonomy system, it is possible to refill the water tank without waiting the product cooling.

## MAXIMUM POWER

Steamjet Handy is really powerful thanks to its 1500 W.

## QUICK

It is really quick to use, infact it takes just 20 sec to release steam.

### INTEGRATED ACCESSORIES

			
WINDOW SQUEEGEE	STEAM BRUSH NOZZLE	CLOTH MOUNTING	ANGLED NOZZLE
			
ROUND BRUSH	STEAMJET NOZZLE	SMALL CLOTH	

	SSNH1300 011	SSNHB1300 011

# IRONING SYSTEM

# IRONSPEED

MULTI STEAM™ TECHNOLOGY: HOW IT WORKS

FOR DELICATE TEXTILES	
Humidification	**
Sole Plate Temperature	Silk
Direction	Around the Iron
Clothes	Silk, cashmere, rayon

FOR EVERY DAY TEXTILE	
Humidification	***
Sole Plate Temperature	At Least "Wool"
Direction	Vertical
Clothes	Cotton, denim, linen, velvet, wool

FOR DIFFICULT AREAS	
Humidification	*
Sole Plate Temperature	Max
Direction	In the tip
Clothes	Sleeves, loops, pockets, buttons

Each steam is created in a dedicated steam chamber and exits from a specific part of the sole plate because all clothes are different and need to be treated differently.

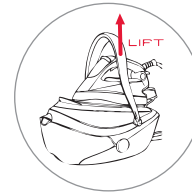

# IRONSPEED

3 TIMES BETTER

### MULTI STEAM™ TECHNOLOGY\*

Maximum care of all textiles thanks to the 3 Ironing Dedicated Programs.

### CARRY HANDLE\*

A fully integrated handle to carry effortlessly the appliance.

### STEAM BRUSH\*

An handheld fabric steamer to iron vertically and horizontally, refresh already worn clothes or remove ingrained odors.

	SRD4110\2 011	SRD 4108\2 011	SRD 4107\2 011	SRD 4102\2 011	SRD 4101\2 011	SFM4002 011	SBM4000 011	SBM4001 011

®

GENERATION FUTURE

# TRADITIONAL IRONING

# IRONFLOW

PERFORMANCE & COMFORT

## AIR FLOW TECHNOLOGY\*

The air is sucked from the environment thanks to the fan positioned at the back of the iron. Fresh air comes out from some holes positioned above the skirt and around the handle.

## COOL COMFORT

The unique design utilises a fan to blow air out from the handle and skirt of the iron.

## CERAMIC SOLEPLATE

High quality ceramic coating to guarantee a better sliding on the textile.

# IRONING SYSTEM

IRONFLOW

	TIF2800 011	TIF2700 011	TIF2600 011	TINF2600 011
<b>MODEL DESCRIPTION</b>	TIF2800 011	TIF2700 011	TIF2600 011	TINF2600 011
<b>PRODUCT INFO</b>				
Product Number	39600155	39600154	39600151	39600153
EAN Number	8016361887527	8016361887510	8016361887480	8016361887503
Colour	Race Red	Lavander	Dunure Blu	Light Aqua Blue
<b>PERFORMANCE AND FEATURES</b>				
Air Flow Technology	•	•	•	
Maximum Power (W)	2800 W	2700 W	2600 W	2600 W
Steam Emission (g/ min.)	50 g/ min.	50 g/ min.	45 g/ min.	45 g/ min.
Turbo Steam Emission (gr)	200 gr	195 gr	190 gr	185 gr
Iron Type	Ceramic	Ceramic	Ceramic	Ceramic
Anty Drip System	•	•	•	•
Self Clean	•	•	•	•
Anti Calc & Auto shut off	•	•	•	•
Variable Steam	•	•	•	•
Cord Storage	•	•	•	•
Steam Regulator	4 shifts	4 shifts	4 shifts	4 shifts
<b>WEIGHTS AND PACKAGING</b>				
Packaging Dimensions (mm)	365 x 160 x 190 mm	365 x 160 x 190 mm	365 x 160 x 190 mm	365 x 160 x 190 mm
Product Net Weight (kg)	1.8 kg	1.7 kg	1.7 kg	1.5 kg
Packed Weight (kg)	2.4 kg	2.3 kg	2.3 kg	2.1 kg
Product Dimmensions (mm)	336 x 139 x 161 mm	336 x 139 x 161 mm	336 x 139 x 161 mm	328 x 132 x 161 mm
